

Effective 1/1/14, there will be a change to the State of Kansas Preferred Drug List.

If you are taking any of the medicines listed below, please talk to your doctor or health care provider about changing your prescription to an alternative medicine, which has a lower member coinsurance. Your doctor is always the most qualified person to balance quality and safety considerations in choosing the most appropriate medicine for you. The final prescribing decision rests with your doctor. Remember, changing to a different medicine is completely voluntary.

### **Preferred Drug List Changes Effective January 1, 2014**

Effective 2/1/14, CVS Caremark we will begin to include HIV, hepatitis B, and transplant therapies as part of our Exclusive Specialty program. Historically these therapies have been serviced under a lower-touch patient care model, often in a combination of retail and mail service pharmacies. By utilizing CVS Caremark Specialty Pharmacy exclusively, Kansas members will receive personalized pharmacy care management services such as:

- Access to a team of clinical experts that are specially trained in your condition
- On-call pharmacist 24 hours a day, seven days a week
- Coordination of care with you and your doctor
- Convenient delivery to the address of your choice, including your doctor's office
- Medicine- and condition-specific education and counseling
- Insurance and financial coordination assistance
- Confidential and empathetic care

- Online support and resources through **[www.CVSCaremarkSpecialtyRx.com](http://www.CVSCaremarkSpecialtyRx.com)**, including condition-specific information and the specialty pharmacy drug list
